

# Tailored 24/7/365 Cyber Protection

Active threat hunting and rapid response capabilities tailored for your business.

The rapid evolution of technology has **heightened cyber threats to higher education**, the private sector, and the government, making data protection ethically and legally essential. In 2023, **\*79% of institutions reported ransomware**, causing severe financial and operational damage. Institutions must evaluate their cybersecurity and collaborate with experts for **robust protection**, deploying them as soon as threats are detected.

Hilltop Technologies offers customized EDR (Endpoint Detection and Response) and MDR (Managed Detection and Response) solutions with **24/7/365 monitoring** allowing institutions to focus on their core objectives.

\*As reported by Sophos

## THREAT HUNTER

Intelligent agent for continuous 24/7 device monitoring and immediate threat response.

## CYBERSECURITY POSTURE

Periodic vulnerability assessments and attack surface management to identify and address security gaps before exploitation.

## INCIDENT RESPONSE

Rapid incident response team promptly identifies and contains data breaches in critical situations.
